

## Motor Carrier Street Turn Policy

The motor carrier in possession of the unit for transfer must initiate the transfer via email to the appropriate group email address (see list below) for the pool with the receiving motor carrier in copy of their message. The receiving motor carrier must accept transfer via the initial email correspondence also retaining the group email address in copy to effect successful transfer of the unit.

Both the initiating and receiving motor carrier must be registered with Flexi-Van as the equipment provider and have a valid approved User Agreement in effect with FVLI.

Failure to accept the transfer or late acceptance by the receiving motor carrier will result in the charges remaining with the initial on hire transaction motor carrier.

This process must be initiated and completed prior to the return of the equipment to a start/stop location.

Email addresses to be used for MC Street Turn requests:
